LABORATORIES

Project # 08-05-21 Cor-Pak Stretch Film

REPORT

DATE: 05/21/2008.

Cor-Pak® Stretch Film Vs. Competitor's Stretch Film

Background:

A competitor's stretch film was submitted for comparison testing with Cortec's Cor-Pak® Stretch Film. It is believed this film was manufactured by Brangs & Heinrich.

Purpose: Perform comparative corrosion testing on the competitor film provided and Cor-Pak® VpCI Stretch Film.

Methods: Razor Blade Test

Materials: Razor Blade Test Kit

Procedure: The above tests were run according to the standard procedures for each.

	Razor Blade		
Competitor Film (1.5 mil)	Fail	Fail	Fail
Cor-Pak® Stretch Film (1.5 mil)	Pass	Pass	Pass

Note: See attached photos of results.

One must be very cautious in the interpretation of these results, as the comparison is not comparing "apples to apples". The manufacture date of the competitor film is not known nor are the environmental conditions the film has been exposed to. Age and temperature are big factors influencing the tack level of these films.

Supplied by: Tart, Brno, Czech Republic
